Experience

National Yunlin University of Science and Technology (Taiwan) 2015.09 - now
Exchange Student

Major in Mechanical Engineering here, but take more courses of Computer Science in fact. Become a member of the 3C Society here, which is a student society focus on IT technique. Help to teach members of this community to learn the basic usage of Git & GitHub, also the basic knowledge of Linux system like Arch.

Technical University of Denmark 2014.09-2015.01
Exchange Student

Major in Mechanical Engineering, but also took some courses in Computer Science department. Take part in International Student activities and start to know more about the Europe countries. Help students try to use LaTeX to write beautiful report, and help solving computer problems among international students community. Also get to know how to run a startup in DTU's startup base center.

China University of Petroleum, Beijing 2012.09 - 2016.06
Bachelor Degree Student

Became fresh man in the year 2012, majored in Mechanical Engineering while found out more interest in Computer Science and the Internet. Learn coding in my free time, attended some open source event in Beijing, like the releasing party of Fedora, party of openSUSE. Learned the use of Git and GitHub by myself, and build my personal blog using Jekyll, hack the theme by myself and ready to become a programmer when I graduate. Wanna make some difference for the other people, by using the tool of internet, the code, the program.
